### PACIFIC NORTHWEST ORDER HEARING TRANSCRIPT

A transcript of the hearing held on December 4, 2001, for the Pacific Northwest Order is now available at [http://www.ams.usda.gov/dairy/pnw\\_pooling\\_standards.htm](http://www.ams.usda.gov/dairy/pnw_pooling_standards.htm).

### MARKET SUMMARIES FOR NOVEMBER

Comparisons to a year ago can be found in the tables on pages 6 and 7.

#### Pacific Northwest

Producers delivered a total of 600.6 million pounds of milk to the market during November. Comparisons to the previous month are biased due to eligible milk not pooled in October 2001. Fewer than three handlers did not pool milk; the amount of eligible milk not pooled is restricted. Daily deliveries averaged 20.0 million pounds, up 9.8 percent from October. An estimated

1,224 producers delivered milk to the market during the month. Daily deliveries per producer averaged 16,356 pounds, down 14.9 percent from October.

Class I producer milk during November totaled 184.1 million pounds, 30.7 percent of total producer receipts. Daily usage averaged 6.1 million pounds, up 0.7 percent from October.

#### Arizona-Las Vegas

Producers delivered a total of 232.7 million pounds of milk to the market during November. Daily deliveries averaged 7.8 million pounds, up 0.9 percent from October. An estimated 114 producers delivered milk to the market during the month. Daily deliveries per producer averaged 68,053 pounds, up 0.9 percent from October.

Class I producer milk during November totaled 81.6 million pounds, 35.1 percent of total producer receipts. Daily usage averaged 2.7 million pounds, up 1.4 percent from October.

*(Continued on Page 2)*

### Federal Order Producer Prices and Component Levels: November 2001

To file a complaint of discrimination, write the USDA, Director, Office of Civil Rights, Room 326W, Jamie L. Whitten Building, 14<sup>th</sup> and Independence Avenue, SW., Washington, D.C. 20250-9410, or call (202) 720-5964 (voice or TDD). USDA is an Equal Opportunity provider and employer.

**Western**

Producers delivered a total of 453.4 million pounds of milk to the market during November. Comparisons to the previous month are biased due to approximately 165.6 million pounds of eligible milk not pooled in October 2001. Daily deliveries averaged 15.1 million pounds, up 58.1 percent from October. An estimated 826 producers delivered milk to the market during the month. Daily deliveries per producer averaged 18,297 pounds, up 58.1 percent from October.

Class I producer milk during November totaled 91.3 million pounds, 20.1 percent of total producer receipts. Daily usage averaged 3.0 million pounds, up 2.1 percent from October. ♦

November 17 and the December 15 surveys, to \$1.2929 per pound. The survey of 500-pound barrels (**adjusted to 38% moisture**) showed a net increase of 7.17 cents to \$1.2543 per pound.

The NASS butter price showed a net decrease of 10.94 cents between the weeks ending November 17 and December 15 from \$1.3319 per pound to \$1.2225 per pound.

The NASS nonfat dry milk showed a net decrease of 0.86 cents since mid-November to \$0.9219 per pound. The average price for NASS whey showed a net increase of 0.26 cents since mid-November to \$0.2910 per pound. ♦

**JANUARY'S CLASS I PRICE ANNOUNCEMENT**

On December 21, the January 2002 Class I price was announced at \$13.86 for the Pacific Northwest and Western Orders, and \$14.31 for the Arizona-Las Vegas Order. The Class I price was calculated using NASS commodity price surveys from the weeks of December 8 and 15.

The December Class III and IV advance skim prices are \$7.34 and \$7.04 per hundredweight, respectively. The butterfat portion of the Class I mover decreased 5.74 cents from \$1.4513 to \$1.3939 per pound.

The January 2002 Class II skim and nonfat solids prices were also announced on December 21. The skim price is \$7.74 per hundredweight, and the nonfat solids price is \$0.8600 per pound for all Federal orders. ♦

**ADVANCED: NASS COMMODITY PRICES FOR CLASS I PRICE CALCULATIONS**

	December	January	Change
Cheese*	\$1.2182	\$1.2895	\$0.0713
Butter	\$1.3051	\$1.2580	-\$0.0471
Nonfat Dry Milk	\$0.9342	\$0.9222	-\$0.0120
Whey	\$0.2851	\$0.2902	\$0.0051

\* The weighted average of barrels plus 3 cents and blocks. Beginning January 2001, barrel cheese prices changed from 39% to 38% moisture cheese.

**NOVEMBER'S CLASS PRICES**

November's non-advanced Class Prices were calculated using NASS commodity price surveys from November 3, 10, 17, and 24. Component prices for the month are \$1.8045 per pound of protein, \$1.4500 per pound of butterfat, \$0.1470 per pound of other solids, and \$0.7949 per pound of nonfat solids.

November's Class III and IV prices at 3.5% butterfat are \$11.31 and \$11.97 per hundredweight, respectively. The November Class III price compared to October is down \$3.29. The Class III price is \$2.74 higher than November 2000 and \$1.51 above the support price.

Class II butterfat was also announced at \$1.4570 per pound. Class I skim and butterfat and Class II skim prices for November were announced on October 19, 2001. The Class II price at 3.5% butterfat is \$12.78 for November.

**FINAL: NASS COMMODITY PRICES**

	October	November	Change
Cheese*	\$1.5591	\$1.2322	-\$0.3269
Butter	\$1.4701	\$1.3040	-\$0.1661
Nonfat Dry Milk	\$0.9441	\$0.9349	-\$0.0092
Whey	\$0.2835	\$0.2823	-\$0.0012

\* The weighted average of barrels plus 3 cents and blocks. Beginning January 2001, barrels changed from 39% to 38% moisture cheese.

**Current Commodity Prices** - - The NASS survey of cheddar cheese prices showed an increase in prices received for 40-pound blocks and 500-pound barrels. The survey of 40-pound blocks showed an increase of 8.22 cents between the

**DAIRY SITUATION AND OUTLOOK**

Wholesale butter and cheese prices have regained a portion of their earlier plunges. Exchange prices for Cheddar cheese rose 16 to 19 cents per pound between late October and late November, about one-third of the drop from the late September peak. Similarly, butter prices have risen about 13 cents per pound following a drop of almost \$1 from the early September peak.

In early September, wholesale prices probably were headed for a downward adjustment in any case. The effects of economic weakness were starting to be felt, and milk production was slowly returning to year-earlier levels. In addition, pipeline stocks probably were unusually large because buyers reportedly started acquiring product for holiday use particularly early. The abrupt drop in buying for restaurant and travel-related use in mid-September precipitated the price declines. With ample pipeline stocks, buyers could minimize purchases on a falling market. Slow movement caused product to back up in warehouse stocks. Warehouse stocks of both butter and cheese declined very little in September, a month that normally sees a large seasonal decline.

Buyers have returned to the market as both retail sales and restaurant use apparently have been fairly good. Softening in demand for these products has thus far been fairly modest. In addition, retailers quickly began price specials, particularly for butter, once wholesale prices dropped. Meanwhile, milk production, while recovering, did not manage to reach year-earlier levels in October. Warehouse stocks of butter and cheese posted relatively large declines during October. Prices probably will be unsettled during the next couple of months but large changes are not expected. Product movement will drop seasonally sometime in the next few weeks as the last holiday orders are filled. However, wholesale movement might be stronger than normal through the post-holiday pipeline refilling period. In addition, increases in milk production and slowing demand are expected to develop only gradually. ♦

**COMMERCIAL DISAPPEARANCE OF DAIRY PRODUCTS FOR FIRST THREE QUARTERS OF 2001**

Commercial disappearance of U.S. milk for the first three quarters of 2001 was unchanged over the same period of 2000. Commercial disappearance is used as an indicator of consumption of U.S. milk marketings and is a residual figure. This measure of consumption includes civilian and military purchases of milk and dairy products for domestic and foreign use (exports), but excludes farm household use, commercial stocks, and imports. The table below shows commercial disappearance by commodity and their milk-equivalent on a fat solids basis.

For the first three quarters of 2001, disappearance of American Cheese and Nonfat Dry Milk increased from 2000. Butter, other cheese, and fluid milk disappearance showed decreases during the same period. ♦

<b>Commercial Disappearance</b>			
	January-September		% Change 1/
	2000	2001	
<u>Selected Products</u>	- - Million Pounds - -		
Butter	917.6	873.5	-4.46%
American Cheese	2,670.0	2,732.4	2.71%
Other Cheese	3,647.7	3,645.1	0.29 %

**OCTOBER 2001 CLASS I ROUTES UP SIGNIFICANTLY COMPARED TO YEAR EARLIER**

In-area route disposition of fluid milk products is the amount of fluid milk products, from all sources, consumed in the selected marketing area. The tables on page 4 show October's in-area route disposition and the change from a year-ago for the Pacific Northwest, and Western Orders, and pool handler route disposition for the Arizona-Las Vegas Order.

In-area route disposition in October 2001, increased for the Pacific Northwest, Western, and Arizona Las Vegas Orders. In general, it is believed that with the recent down turn in the economy and due to the terrorist attacks on September 11, 2001, people are eating out less and thus consuming more fluid milk products with their meals at home. The market administrator's office staff is looking at these numbers closely to discern an explanation.

**Arizona-Las Vegas Order**

The table below for the Arizona-Las Vegas Order is in-area route disposition by product for pool handlers, October 2001 and 2000. For the month of October 2001, the total disposition of fluid milk products in the marketing area of the Arizona-Las Vegas Order is restricted, due to how information was released previously. During October of 2001, in-area route disposition by pool handlers decreased 2.3 percent from the same period in 2000. Even though pool plant routes decreased, total in-area route disposition increased by about three percent between October 2000 and 2001. This increase can be attributed to handlers with sales into the Arizona-Las Vegas Order that are not pool handlers.

**In-Area Route Disposition By Pool Handlers  
Arizona-Las Vegas Order (FO131)

1/ Based on total in-area route disposition by pool handlers, handlers regulated by other Federal orders, partially regulated handlers, and producer-handlers. 2/ May not add due to rounding. 3/ Includes eggnog and small amounts of miscellaneous products.

**UNITED STATES MILK PRODUCTION  
UP 0.4 PERCENT IN NOVEMBER 2001**

Milk production for November 2001 was up 0.4 percent for the United States compared with November 2000. United States milk production for November 2001 equaled 13,271 million pounds, 59 million pounds more than last November. The graph below shows monthly milk production for the 20 major dairy states, January 2000 through November 2001. The table to the right shows data for November 2001 for selected states with comparisons to year-ago levels.

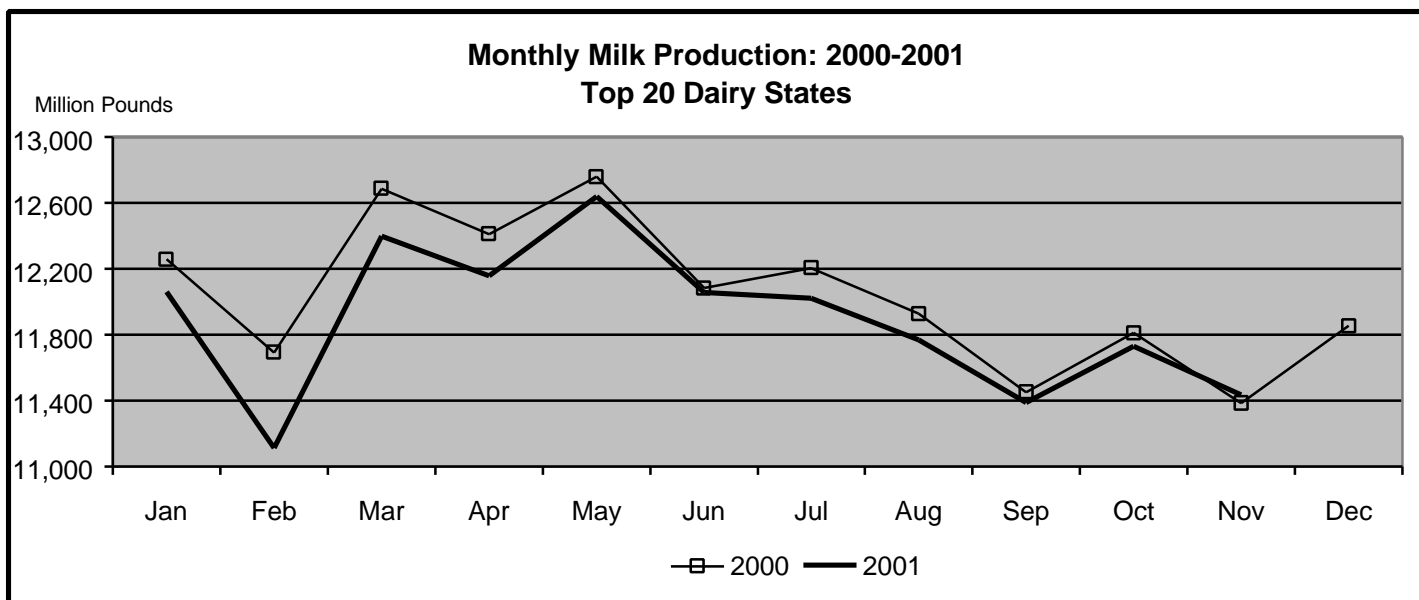

Milk production in the 20 major states during November 2001 totaled 11,436 million pounds, up 0.4 percent from production in these same states in November 2000. This is the first time milk production has been above year earlier levels since November 2000.

In rank order of contribution, California, New Mexico, Idaho, New York, Arizona, Indiana, and Washington were the primary sources of increases in milk production that more than offset the decreases in the other states. In a similar method of ranking, Wisconsin, Minnesota, Texas, Missouri, Pennsylvania, Florida, Illinois, and Iowa showed decreases in milk production from year-ago levels.

The number of milk cows in the US was up from October at 9,083 thousand head, but down 125 thousand (1.36%) from November 2000. Milk production per cow is down from October but is slightly higher this November (1,461) compared to last November (1,435). ♦
