## CONTINUATION OF REVISION IN SHIPPING PERCENTAGES

*The following is an excerpt of a letter sent to FO 124 pool handlers.*

**SUMMARY:** This action continues the reduction of the percentage of a cooperative association's producer milk that must be delivered to pool distributing plants to qualify its manufacturing plant for pool status. The order states that a specified percentage of producer milk must be delivered to pool distributing plants during either the current month or, on average, the immediately preceding 12-month period ending with the current month to qualify a cooperative's plant.

The purpose of this standard is to assure an adequate supply of milk for fluid consumption while enabling the continued pooling of producer milk that currently is pooled without the need for uneconomic movements of milk, which would result in disorderly marketing. To accomplish this goal, the order must reflect the needs and nature of the market.

The minimum shipping percentages applicable pursuant to this revision are: 15%, effective July 1, 2022 - June 30, 2023.

**STATEMENT OF CONSIDERATION:** This proposed action is a continuation of the request made in May 2019 and granted in June 2019, effective July 1, 2019. In May 2020 and May 2021, comments were requested to continue the reduced shipping percentage through June 30, 2021 and June 30, 2022, respectively. The continuations were granted. Dairy Farmers of America (DFA) requested the Market Administrator review the request annually. This proposal was originally requested by Cooperative Regions of Organic Producer Pools (CROPP), a handler regulated under the Pacific Northwest Federal Milk Marketing Order. CROPP requested the decrease of the percentage of producer milk that a cooperative association must ship to pool distributing plants to qualify its manufacturing plant for pool status, specified in section 1124.7(d), from 20 percent to 15 percent.

On May 27, 2022, this office notified Federal Order 124 handlers of a Proposed Continuation of Revision in Shipping Percentages for Manufacturing Plants Operated by a Cooperative Association and invited the submission of comments, data, or views on this request by no later than June 24, 2022.

Based on the comments received and analysis of available information and data, it is determined that the percentage of producer milk that a cooperative association must deliver to pool distributing plants during the current month or, on average, the immediately preceding 12-month period ending with the current month, be reduced to 15% through June 30, 2023, at which point, marketing conditions will be reviewed to determine if 15% continues to be appropriate.

As provided in section 1124.7(g) of the Pacific Northwest Federal Milk Marketing Order, the Market Administrator may review the need for any further adjustment on the Market Administrator's own initiative or at the request of interested parties.
